## Project Description and Background

The case was continued from the June meeting to allow more time for the applicant to talk with staff.

The applicant is requesting to rezone from “AG” Agricultural to “I” Light Industrial for a sexually oriented business use. The proposed site is south of Trinity Blvd along US Hwy 157. The site is surrounded by other industrial uses on land zoned with varying degrees of industrial. The neighborhood appears to contain warehouse buildings, manufacturing facilities, and large fuel storage tanks. The applicant has provided the narrative below.

Due to a fire on the property, City Staff has indicated that the only way we can proceed with rebuilding and reopening the previous business is to obtain a zone change. Operations will be unchanged from the prior use.

If approved, the applicant will have to comply with a myriad of supplemental standards and obtain a specialized Certificate of Occupancy by our Building Official. For the purposes of this zoning cases, staff is assessing if the proposed “I” Light Industrial is appropriate at this location.

## Development Impact Analysis

### Land Use Compatibility

The applicant is proposing to rezone the property to “I” Light Industrial to develop the site with a sexually oriented business. The surrounding properties are zoned for industrial uses. It is important to note that the property to the north and west explicitly removes sexually oriented businesses through the PD process which means that care has been taken to mitigate the potential for this use in the future. No residential sites are found within the general vicinity. The proposed zoning request **is compatible** with surrounding land uses and located within an established industrial area. However, the nature of the proposed business may not be appropriate at this location.

### Comprehensive Plan Consistency

The adopted Comprehensive Plan currently designates the subject property as “Neighborhood Commercial” on the Future Land Use Map. The requested use would not be included in the list of zoning districts envisioned for this category and is **not consistent**.

The proposed zoning is not consistent with the land use designations for this area and with the following policies of the Comprehensive Plan:

- Promote appropriate infill development of vacant lots, old commercial centers (greyfields), and contaminated sites (brownfields) within developed areas, particularly in the central city.
- Encourage new development adjacent and connected to previously developed or platted areas in order to utilize existing utility and road infrastructure and services, thereby optimizing public and private investments and discouraging sprawl development.

Based on lack of conformance with the future land use map and with the policies stated above, the proposed zoning is **not consistent** with the Comprehensive Plan.
