Subject: 42-INCH EMERGENCY WATER MAIN REPAIR EAST OF FOURNIER STREET AT HOLLY WATER TREATMENT PLANT

On March 27th, 2025, standing treated water was found in the steep hillside east of Fournier Street close to the east gate of the Holly Water Treatment Plant. The source of the water was due to a leak that was discovered on the 42-inch water main coming out the treatment plant and up the hillside. The leak must be repaired as soon as possible to prevent pipe failure and collapse of the hillside.

Water Field Operations Crews are not able to conduct repairs of this magnitude.

This memo is submitted to inform the CMO that, pursuant to the emergency authority found in City Code Chapter 2, Article I, Section 2-9 of the City's Code of Ordinances, the Water Department engaged the following contractor to perform the necessary repair:

William J. Schultz, Inc. dba Circle C Construction Company: \$400,000.00

Waiting to bid and award a contract to perform this work is not the best interest of the health and safety of the City of Fort Worth. In addition to the citations, above, Section 252.022 of the Local Government Code exempts from normal bidding requirements expenditures that are necessary to preserve or protect public health or safety of the municipality's residents and procurements necessary because of unforeseen damage to public machinery, equipment, or property.

A confirming M&C will be circulated to ratify the contract after the work has been performed.
