Design is expected to start in July 2021 and be completed by May 2022. Construction should commence in September 2022 and be completed in June 2024. The sanitary sewer component of this project is part of the Water Department's Sanitary Sewer Overflow Initiative Program.

Approval of Recommendations 2 will adjust appropriations between a programmable project and convert the 2022 Bond Year 1 Contract 1 project into a static capital project. This action is needed as future funding for this project is anticipated from other funding sources and the scope of this project differs from that of the current programmable project.

Appropriations for the water, sanitary sewer, storm drain and paving improvements for 2022 Bond Year 1 Contract 1 project by Fund will consist of the following:

Fund	Existing Appropriations	Additional Appropriations	Project Total*

*Numbers rounded for presentation purposes.

The City's Business Equity goal on this project is 12 percent. Additionally, Pacheco Koch Consulting Engineers, Inc. is a certified M/WBE firm.

In order to administratively track the spending of all funding sources in one project, appropriation ordinances are needed to move appropriations from the programmable project to the jointly funded static project. This action will amend the FY2021-2025 Capital improvement Program as approved in connection with Ordinance 24446-09-2020.

This project is located in COUNCIL DISTRICT 8.

FISCAL INFORMATION / CERTIFICATION:

The Director of Finance certifies that funds are available in the current operating budget of the Water & Sewer Fund and the Drainage Improvements programmable project within the Stormwater Capital Projects Fund and upon the approval of the above recommendations and adoption of the attached appropriation ordinances, funds will be available in the current capital budgets, as appropriated, in the W&S Capital Projects Fund, Street Imprvmnt COs Residuals Fund, and Stormwater Capital Projects Fund for the 2022 Bond Year 1 - Contract 1 project to support the approval of the above recommendations and execution of the engineering agreement.
