The work to be performed under this contract consists of extending, replacing and/or relocating water mains, services, and other pertinent construction required to provide water service to individual customers or developers. While funding for this contract comes from the Water and Sewer Capital Projects Fund, the Water Department issues work orders to the Contractor after payment of applicable estimated costs by the Customer and/or Developer.

The bid documents included a stipulation that the total quantities listed may not reflect actual quantities and that the amount budgeted for the projects is \$2,000,000.00. Final payments will be made based on actual measured quantities. The bid documents also included a stipulation giving the City the option to renew (subject to appropriated funding) this contract two times under the same terms, conditions and unit prices.

In addition to the contract amount \$500,000.00 is required for project management, real property acquisitions, survey, contingencies, material testing and inspection.

This project will have no impact on the Water Department's operating budget when completed. Construction is expected to start November 2019 and be completed when the contract amount is exhausted.
