

# Mayor and Council Communication

**DATE:** 11/28/23

**M&C FILE NUMBER:** M&C 23-0993

**LOG NAME:** 03ADOPT TRINITY RIVER VISION STORM DRAIN MASTER PLAN 2023

**SUBJECT**

(CD 2 and CD 9) Adopt the Trinity River Vision Storm Drain Master Plan and Adopt Ordinance Amending Chapter 31 Subdivision Ordinance to Incorporate the Trinity River Vision Storm Drain Master Plan

---

**RECOMMENDATION:**

It is recommended by the City Plan Commission that the City Council:

1. Adopt the attached Trinity River Vision Storm Drain Master Plan, and
  2. Adopt the attached ordinance amending Chapter 31 Subdivision Ordinance to incorporate the Trinity River Vision Storm Drain Master Plan.
- 

**DISCUSSION:**

The 2014 Trinity River Vision Storm Drain Master Plan (“Master Plan”) was prepared to analyze the drainage system on and around Panther Island, to identify storm drain infrastructure affected by the U.S. Army Corps of Engineers Central City Flood Control project, and to determine the proposed storm drain projects including canals necessary to handle drainage on Panther Island. City staff have used the Master Plan to inform City-led storm drain relocation projects supporting the Central City Flood Control project.

On November 17, 2023, the City Plan Commission voted to recommend adoption of the Master Plan and adoption of the Subdivision Ordinance amendment to incorporate the Master Plan. Adoption helps ensure that private development and associated developer plans for public infrastructure on Panther Island are consistent with the Master Plan.

A Form 1295 is not required because: This M&C does not request approval of a contract with a business entity.

---

**FISCAL INFORMATION / CERTIFICATION:**

The Director of Finance certifies that approval of this recommendation will have no material effect on City funds.
